GENERAL INFORMATION:
APPLICANT: Ghosh, Malabika
APPLICANT: Tang, Y. Tom
APPLICANT: Tang, Y. Tom
APPLICANT: Ren, Feiyan
TITLE OF INVENTION: Methods And Materials Relating To Stem Cell Growth Factor-Like
TITLE OF INVENTION: Polypeptides and Polynucleotides and Therapeutic Uses Thereof
FILE REFERENCE: HYS-44
CURRENT PAPLICATION NUMBER: 2001-10-05
PRIOR APPLICATION NUMBER: D07-10-05
PRIOR APPLICATION NUMBER: D07-52, 317
PRIOR APPLICATION NUMBER: 09/552, 317
PRIOR FILING DATE: 2000-04-25
PRIOR FILING DATE: 2000-04-25
PRIOR FILING DATE: 2000-01-21
NUMBER OF SEQ ID NOS: 15

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 472,

Title: US-09-918-715-230 Perfect score: 2691

1 MRGELWLLVLVLREAARALS......rAEVEPSGHEKEGFMEAEQC 500

Scoring table: BLOSUM62 Gapop 10.0 , Gapext 0.5

Sequence:

Searched: 112892 seqs, 41476328 residues

Total number of hits satisfying chosen parameters: 112892

Minimum DB seq length: 0 Maximum DB seq length: 200000000 Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

Database : SwissProt_40:*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
